Urgent need in Uszka, Hungary

Psalm 82:3 NKJV

*Defend the poor and fatherless;
Do justice to the afflicted and needy.*

A recent hailstorm in Uszka has left the entire town in a real emergency situation. Hailstones as big as tennis balls pounded the area, destroying crops and doing a great deal of damage to the property of many people. From the Light to the Nations church alone, 14 homes have roofs that need to be replaced. It should also be noted that the home of Pastors Jenő and Erzsike Orgován received only minor damage from the hail.

The area of Hungary where Uszka is located is known as the apple and cucumber production center of Hungary. Some, but not all of the cucumber crop has been replanted, but they are still weeks behind normal harvest. The people in Uszka are very hard working, and rely on the cucumber harvest for their yearly income. Even though the people work very hard, and have been able to provide their own food and shelter, they have not been able to set aside any reserve finances for a disaster such as this.

To complicate matters, the people in Uszka can get no help from the government because the mayor, who has been a great help to the Romas in the area, happens to belong to the “wrong” political party.

The cost to replace/repair the 14 roofs will be about \$11,000 US dollars. While they have not asked for financial help, but have asked for prayer, we would like to help our friends in Uszka as soon as possible. If any of you would like to help, a gift of any amount will be greatly appreciated. Please designate any gift you might give as “*Help for Uszka*”.

Thank you for your prayers and financial support for Light to the Nations Ministries. Good seed sown in good ground, brings a great harvest! Thank you!!!

Love and blessings,

Dan & Marta Lewis

These pictures show the size of the hailstones and some of the roof damage to homes in Uszka, Hungary which will need to be repaired or replaced before winter. Please pray for the people in Uszka, as they work to prepare for a harvest of cucumbers even though they are several weeks behind a normal year of harvest.
